GRAIN AND PROVISIONS. CHICAGO.

FEATURE ON EXCHANGE

CHICAGO.

CHICAGO. March 26.—Complaints that Kansas had received only a few light showers and that the western third of the state was in decided need of moisture gave the wheat market today an upturn. Brokers for a leading speculator were prominent in the buying. Sales were scattering. The market opened ½ down to a like amount up, and then gradually advanced.

Many dealers in corn leaned to a belief that the edge was off the demand for the present at least. Overnight sales from here were small. Prices started unchanged to ½ lower, reacted a little and then sagged all around.

Oats seemed disposed to hold about steady. The bulls contended that the cereal was relatively cheaper than other grain.

Weakness at the vards carried pro-

other grain. Weakness at the yards carried provisions lower. First sales ranged from 5c off to an advance of 2%, but later there was a general decline.

Doubt Pollution.

In their report on the Smith bill the Commissioners make it plain that they have some doubt as to whether or not the emptying of sewage into the Potomac river causes pollution, endangering the oyster beds and menacing the health of the population of the District, as well as causing heavy losses to the oyster industry.

They point out that sewage is discharged into the river from Alexandria and other points in Maryland and Virginia which are nearer the oyster beds than the District of Columbia.

In the event the bill is favorably acted on by Congress the Commissioners suggest that the total authorized expenditure be increased from \$3,000 to \$4,000, as it is estimated that the additional amount will be necessary to cover the cost of building intercepting sewers to divert
